---

Happy New Year ... and my apology for not having replied sooner, due to my and XDD's holidays/vacation 12/23 - 1/3. Due to the sub-zero temperatures in St. Louis today, Eastman/Solutia's office is closed, so I am working from home (hopefully you have that luxury in Chicago too).

I remember working with XDD to address your 9/24/13 letter before they proceeded to conduct the first annual CPA soil sampling in November, but sending a reply must have "fallen through the cracks." Upon my return to the office (tomorrow, although still below zero?), I will coordinate with XDD to issue that reply no later than next week.

P.S. Before and since sending you the 3<sup>rd</sup> quarter 2013 groundwater monitoring reports in October, I have been working with GSI Environmental and URS Corporation to prepare an update of the August 2010 "Periodic Technical Reviews" of those programs along with a "Northern Plume Stability Analysis," the latter prompted by our discussions of that subject the last couple of years. I expect to submit those next week as well.

Hi, jerry. I'm trying to catch up on your latest submittals as it is very quiet around here this time of year. Have some inspection reports and the NTF SVE System startup summary. Has any reply been sent yet to our 9/24 letter on approval of the sve and eabr SAP that I might be missing. Thanks, ken
